

1                   **ABSTRACT OF THE DISCLOSURE**

2

3                   An aircraft comprising a fuselage, thin

4   supersonic wings on the fuselage, there being trailing

5   edge flaps carried by the wings, the flaps configured

6   to provide flap deflection to simultaneously control

7   wing twist and to reduce drag, when the aircraft is

8   operated at subsonic flight conditions.
